

MP Handdesinfektionsmittel

(MP hand sanitiser)

Product

MP Handdesinfektionsmittel is based on the active ingredient ethanol Formulation 4 according to the general decree with file number 5.0- 710 30/01.00003 for approval of biocidal products containing 2-propanol and ethanol for hygienic hand disinfection, issued by the Bundesanstalt für Arbeitsschutz und Arbeitsmedizin (Federal Institute for Safety and Health in Germany)/ Bundesstelle für Chemikalien (Federal Agency for Chemicals).

MP Handdesinfektionsmittel is free from phenol and perfume, clear and due to the combination of active ingredients it is very easy to use and gentle to the skin because of its lipid-regulating formulation.

Characteristics

MP Handdesinfektionsmittel is used for hygienic hand disinfection to prevent infections.

Application

For use, rub the hands twice with about 3 ml of the solution MP Handdesinfektionsmittel and keep them moist for 30 seconds.

Proceed as follows:

Apply 3 ml of the solution MP Handdesinfektionsmittel in a cupped hand and follow the standard rubbing procedure as described below. Each step should be executed for about 5 seconds. Duration of the entire procedures is about 30 seconds.

- Step 1: Rub hands palm to palm.
- Step 2: Rub right hand over left dorsum and vice versa.
- Step 3: Rub palm to palm with fingers interlaced.
- Step 4: Rub backs of fingers to opposing palms with fingers interlocked.
- Step 5: Rotational rubbing of right thumb clasped in left palm and vice versa.

MP Handdesinfektionsmittel

Step 6: Rotational rubbing, backwards and forwards with clasped fingers of right hand in left palm and vice versa.

Notes on safe use

For safe use of MP Handdesinfektionsmittel observe the following notes:

- Always read the technical data sheet and labelling carefully before use.
- For external use only.
- Avoid eye contact.
- Keep out of the reach of children.
- Observe expire date on the bottle.

Remarks

Frequent use of MP Handdesinfektionsmittel may cause irritation of the skin, resulting in redness and dehydration. As a remedy, measures for skin protection and skin care should be intensified accordingly. Contact dermatitis is also possible. In case of hypersensitivity to one of the ingredients, MP Handdesinfektionsmittel must not be used.

First aid

If MP Handdesinfektionsmittel accidentally gets into the eyes, rinse immediately with plenty of water for about 10 minutes. Eye wash bottles and eye showers are particularly suitable for this. If a burning sensation continues after this treatment, consult a doctor.
